

SMART FREEZER 600

Next Level Vending

A customer unlocks the kiosk through an app, or with a credit card (optional extra), and picks up products they want to purchase. Before the purchase end customers can choose to browse products (description, nutrition facts and prices), view FAQs and more through its innovative User Interface. The end customer will be charged for what they have removed from the smart freezer once the purchase is completed.

Instant Interact Unit

It contains the touch screen, any physical payment unit as well as the lock that allows the cooler to be opened.

Different Payment Solutions

With payment solutions ranging from Chip&Pin and swipe to the Lova App or contactless payment.

Smart Shelf Technology

The shelves, equipped with smart technology and LED lighting, can handle individual products from as low as 15g and can keep track of total loads of up to 10 kg.

Up to 5 Shelves

The instant freezer can have up to 5 weighted shelves per unit.

Model: Duo 600

SmartFridge

The Instant Smart Cooler and Freezer family of products provides a new revolutionizing way to sell food, snacks and beverages to end customers. Unlike a traditional vending machine, the smart cooler doesn't have any robotics and instead let customers grab and return products directly from/to the shelves. It also provides automatic live inventory updates without the need to specify any product amounts or perform any manual counting of products.

SMART FREEZER 600
