

Festival

Snack & Food

Design and user interface

- LED illuminated products for a bright retail experience and clear visibility of the machine within the location.
- User friendly features such as a backlit shopper button and clear pricing screens.
- Premium design is suitable for all surroundings.

Highlights

- Cooler unit with R290 technology with a modular design for easy removal and maintenance.
- 8 or 10 drums with up to 36 compartments per drum (Drum depth: 280mm).
- Set prices for individual segments up to a maximum of 40 different prices.
- Flexible snack offering - small snacks, cans and plated meals (Plate Diameter: up to 225mm).
- Reduce downtime with independent drum operation - the machine will still operate if one or more drums have been removed, either for cleaning or repair.
- Each drum can be set to a time zone, to reserve products for specific times or shift patterns.

Electronics and Temperature Control

- Data transmission and retrieval according to EVA DTS standard.
- Variable temperature options.
- Intelligent loading option - saving energy and preventing temperature fluctuations.

Features	
Height	1830mm
