The VendSmart machine range

Meet our new vending machines – they offer the best vending experience. They have advanced technology to help increase sales and make customers happier.

CE ROHS ISO9001 Certification

The next generation of vending is here...

Introducing our latest machines, equipped with advanced features to enhance your vending experience, all machines come as standard:

- **Telemetry Enabled:** Bi-directional telemetry and the Nayax contactless system are now standard, offering multiple payment options such as smartwatch, debit/credit cards, mobile payments, facial recognition technology, and the convenient Monyx app.
- **Live Sales Reporting:** With our LSR technology, you can rest assured that your money won't be deducted from your bank account if the machine fails to dispense your desired item, providing you with peace of mind.
- **No Product Damage:** Say goodbye to the frustration of broken chocolate bars and fizzy drink mishaps. Our innovative elevator system ensures that products are gently placed in the collection hatch, eliminating any drop-related damage.
- **No Product Jams:** To further enhance your vending experience and minimise drink jams, all VendSmart machines feature adjustable tray selections, along with a robust metal plate and support bar for added reliability.

Product Examples:

- Fresh fruit
- Salad boxes
- Microwaveable meals
- Snacks like chocolate, biscuits, and crisps
- Delicious sandwiches
- Assorted canned beverages

And the list goes on...

Telemetry

Telemetry is just one of the many ways RSL is driving the technological revolution in vending, so we make sure telemetry comes as standard on all our vending machines

What makes telemetry essential for my business?

By including telemetry as a standard feature, we're not only staying up-to-date with the latest advancements in the industry but also helping our clients do the same. It's a clear sign of our commitment to making vending better through innovation and technology.

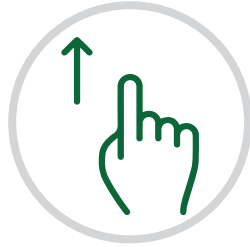

- Maintaining machines at ideal stock levels with attractive product selections to boost sales and customer involvement.
- Providing comprehensive management reports and in-depth sales data for insights into consumer preferences.
- Scheduling visits based on actual machine usage, reducing unnecessary trips and aligning with our carbon-neutral initiative.
- Offering transparent revenue information to monitor financial performance effectively.
- Ensuring no outdated product lines to prevent customer dissatisfaction.

Live Sales Reporting

With our LSR (Live Sales Reporting) technology, you can rest assured that your money won't be deducted from your bank account if the machine fails to dispense your desired item, providing you with peace of mind.

Touch-free selection and payment

The world of vending machines has evolved and become high-tech and exciting. By partnering with leading contactless payment providers, we are going beyond contactless and cashless payments to offer facial recognition, remote machine management, improved efficiency and customer loyalty programs for your vending solution.

Remote control management

The VendSmart range has a remote control management system that can be accessed using a PC or phone. Making it easy and quick to change products, videos, images and pricing.

Fault reporting

A device is fitted to the machine which sends direct alerts to our customer care team as soon as it detects an error or problem. This will then activate an alert to the relevant engineer/operative to visit the site and resolve the issue.

With this software, you can also view a snapshot of your machine estate over time, highlighting any problematic machines to assist with future planning.

VendSmart Optic Media

49" HD screen

The VendSmart Optic Media hits hard. With a 49" full HD display, this machine is ideal for any industry that wants to step into the future. The Optic Media is perfect for advertisements, instruction guides, allergy information and more.

OakHouse Foods microwave meals

Refreshment Systems has collaborated closely with Oakhouse Foods to curate an extensive menu, catering to various day parts such as breakfast, lunch/light bites, dinner, and desserts. This collaboration results in a truly enticing 24/7 food selection that will undoubtedly beckon your staff and visitors, ensuring repeat visits.

Within this menu, you'll find a diverse array of options, accommodating vegetarians, gluten-free, and dairy-free diets, making it an inclusive culinary experience for all.

Microwave unit

Every Subzero is available with a microwave housing unit that carries its own Oakhouse Foods branding.

This unit can accommodate one or two commercial microwaves. The microwave supplied as part of this solution from RSL is a microwave that scans the sleeve on the meal to heat to the right temperature.

Dimensions: 2000mm(H) X 750mm(W) X 650mm(D)

Did you know?

Oakhouse Foods have delivered over **40 MILLION** meals up and down the Country out of its nationwide network of 30 depots.

Advertising & Contactless Payments

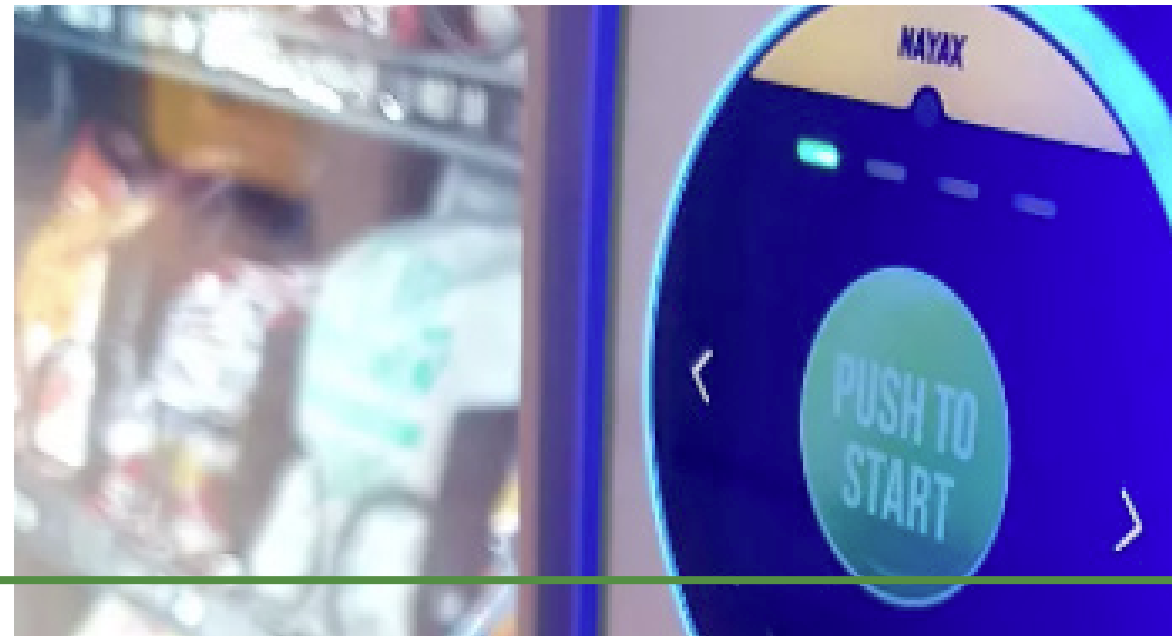

We are committed to delivering a cutting-edge vending experience, and that's why we've chosen Nayax as our trusted partner for payment solutions. But that's not all! We have taken vending to the next level by incorporating built-in LED media screens into our machines.

Advertising

With the built in LED media screens you can easily advertise. We have an in-house design and marketing team who can create bespoke advertising and videos.

With our on-site printing facilities we are flexible and are able to produce a wide range of marketing materials, contact our marketing department for further details.

Nayax contactless payments

Our chosen partner for vending payment solutions is Nayax, an industry leader when it comes to contactless payments.

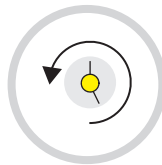

Easily manage your machine estate remotely using the management suite, making better use of staff time and cutting costs.

Use the marketing features to increase sales and customer loyalty, with various tools built into the system.

Customer and employee loyalty app

The Monyx wallet is an exciting payment app that gives users a wealth of information and features including the ability to track spending, win prizes and save money each time they top up their credit.

Benefits for users:

Instant refunds

Users can be refunded instantly through the online management portal

Spend tracking

See what you are spending & where

Discounts

(10% extra added to your account every time you top-up by £10)

Gifts

Encouraging return custom and loyalty
